

MMRS Evacuation Seminar

November 18-19, 2013
Denver Marriott DTC
4900 S. Syracuse Street

Attention **Home Health Care** agencies! Your track will consist of multiple group stakeholder discussions to review and develop plans, agreements and procedures that may affect how you respond and provide services to your clients during a disaster.

Audience: Executives, Operations-level staff, planners and emergency managers.

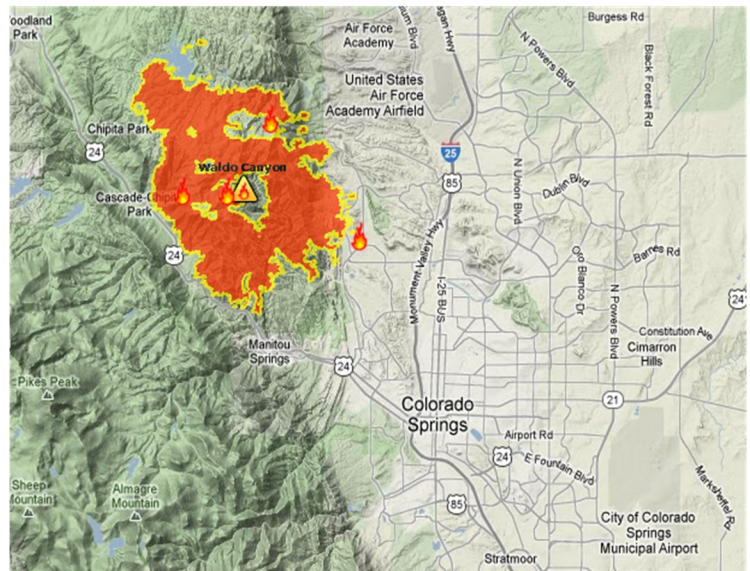

Agencies: OEM, hospitals, home health agencies, long-term-care facilities, public health, fire & EMS, law enforcement, mass care, VOADs & others

Does your agency have a plan for emergencies or disaster for your employees AND your clients?

Do your clients have a support system in the event that essential home healthcare services are disrupted?

Do you know the resources within your clients community that may be asked to assist?

Do you need help in developing plans, forms or other materials to assist your staff in ensuring your clients are ready to evacuate?

The Regional Partners of the Colorado Front Range MMRS invite you to join together in addressing these and other difficult issues.
